DEERING

Standard of the Harvest

Binders, Mowers, Rakes.

The praise of satisfied users throughout the agricultural world has made the name of DEERING so well known that it hardly seems necessary to dwell at great length upon the merits of the Deering machines. For those however, who have not had the pleasure and satisfaction of using this machine will say they run lighter, last longer and make more happy farmers than anything of its kind wherever grass and grain are grown. See them on exhibit, or phone or write the Planters Hardware Co., incorporated, for prices and full particulars.

Deering Binder Twine

Another thing that makes the farmer happy is TWINE that will work in all makes and kind of binders, one that runs even, and the long, smooth and strong, made of the best of manila and sisal fibre the world affords. Give us your order for your Machines and Twine. Have your wagons loaded with anything in our line.

Planters Hardware Co.

South Main St. Hopkinsville, Ky.

To Harness Victoria Falls

Source of the Power, Victoria Falls.

If the stupendous undertaking of certain English capitalists is carried out to a successful conclusion Darkest Africa will become Lightest Africa. For with the unlimited power of Victoria falls on the Zambesia harnessed and transmuted into electrical energy there will be no limit to the possibilities resulting therefrom. The breadth of the falls is 5,400 feet and the fall of the water is 330 feet to the gorge below. This energy now going to waste is to be utilized and the electricity generated transmitted over 600 miles to the gold mines at Johannesburg. How bold such plan is can be appreciated when it is stated that the longest transmission of electrical current up to the present time is only a little over 150 miles. And so if the project succeeds it will not only mark a marvelous development in the handling of the electrical current, but the labor problem of the Rand will find easy solution. The firm of Sir Douglas Fox and partners are the engineers-in-chief of the enterprise, known as the Victoria Falls Power company, Limited, the advisory board including such eminent scientists as Lord Kelvin, M. Andre Blondel, of Paris, Dr. Klingenberg, professor at the Royal Technical college of Berlin, and Dr. E. Tissot, of Bale, amongst the engineers associated with them being Mr. Ralph D. Mershon, of New York, who has a world-wide reputation in connection with long-distance electrical transmission, and Mr. Arthur Wright, consulting electrical engineer to the boroughs of Brighton, Marylebone and Stepney; while also connected with the project are such well-known names as Sir Lewis Mitchell, general manager of the Standard Bank of South Africa, and Mr. H. Wilson Fox, manager of the Chartered company, and originator of the power scheme. The Victoria falls lend themselves admirably to the generation of electricity by hydraulic power, and the construction of the proposed works offers no great engineering difficulties. To begin with, electrical plant for the production of 50,000 horse power will be installed, though the intake and the canal will be made large enough for double that capacity. The intake will be on the left or northern bank of the river, above the falls, and the canal will conduct the water to a spot near the top of the gorge at the first bend below the falls. Hence it will be delivered through steel tubes to the powerhouse near the water's edge 350 feet below. By high tension electric current the power will be conveyed to the Rand, and at the main receiving station a system of hydraulic storage will be installed. The object of this is to store the energy not immediately wanted by pumping water to the top of a high hill, whence it is released, as required, for the production of fresh electrical power. Coupled with this hydraulic storage will be a steam-driven reserve station, with a capacity of 20,000 horsepower, as a standby in case of temporary interruption of the current from the falls, another guarantee that users of the supply will have absolute security for its continuity. It is well to remember that the enterprise will in no way interfere with the beauty of the falls, for the British South Africa company has fenced off a large area as a public park, extending some miles along both banks. The Victoria Falls Power company will have a total capital of \$30,000,000. The first instalment of the work will be completed in two years, and the company will effect a saving of \$5,000,000 per annum in the cost of working the mines.

Mr. H. Wilson Fox, the manager of the company, is enthusiastic over the project and in explanation of the plans to the English capitalists interested he declared that the difficulty which had been suggested that the Kafirs might climb the cable towers and cut the wires was too absurd even to mention.

"The objection has also been made," said Mr. Fox, "that white ants may eat the coverings of the cables, but the reply to that is that the cables will not be covered. Ants will not climb 60 feet to eat metal, and, if sufficiently athletic to make the attempt,

I am afraid that they will be bitterly disappointed with the result.

"At our main receiving station near the Rand an entirely new departure will be introduced through the utilization of a system of hydraulic storage. So far as we can discover, this expedient has never been previously employed in connection with long-distance transmission.

"The main purpose of this device is to prevent waste of power. In any industry—and mining is no exception—there are slack hours. Between shifts, power is in full swing. Nevertheless, the water does not cease to fall over the lip of the falls, the turbines continue to generate current, and if our customers do not use it, the power will be wasted. To prevent this waste we shall, whenever there is spare power available, use it to pump water into a reservoir at the top of a high hill, where it will constitute a reserve supply of energy. We can then allow it to run down again through pipes to the bottom of the hill, and we shall thus be able to constitute at pleasure an artificial waterfall, and by its use regenerate power.

"When the line reaches the Rand, it will be worked in conjunction with a large steam-driven reserve station. Our customers will therefore have a triple security.

"Consider, too, the effect which the development of power at the falls upon a large scale may have upon the future destinies of South Africa. The establishment of great industries at the falls themselves, the supply of water for irrigation to agriculturists, and the provision of cheap power to the mines in the Transvaal, will all tend to give greater employment to European labor, and will help to redress the balance between white and black."

SETTLED IN FEW WORDS.

Connoisseur Quickly Determined the Status of Port Wine.

Winter strawberries are raised in a large way by S. E. Jeter, of Humboldt, Tenn. In all the big cities Mr. Jeter's strawberries can be bought in the coldest weather, and the fruit is as sweet and delicate as that of June.

"It is one thing to raise winter berries, and it is another thing to raise good ones—to raise the kind that don't knot up your face like a mouthful of lemon," said Mr. Jeter.

"You test strawberries as you test port wine, by the color, the odor, and the flavor. And there are few winter berries that will meet this test. It is like the port wine story.

"A gentleman invited a connoisseur to try some port that he had just laid in. 'I like it myself,' he said, 'but I admit I'm no judge. I'll feel better about it after I've heard your opinion.'

"Well," said the connoisseur, 'we judge a glass of port in three ways: First by the color, second by the odor, and third by the flavor.'

"He held the glass to the light.

"The color of this port is very good," he said.

"He sniffed it delicately.

"The odor," he said, 'is far from unpleasant. Now for the taste.'

"He sipped the wine, and then put his glass down hastily.

"Would you mind passing me the claret?" he said.

First Coffee in Europe.

Coffee was first publicly drunk in England when Ted Edwards opened his coffee shop in London in 1652. He imported the idea from Cairo, in which city cafes have abounded for centuries back, there being no fewer than 2,000 there in the year 1563. French coffee, so much in vogue with certain drinkers, begins its history with Louis XIV., who drank the first cup. Taverns for the sale of coffee were first opened in Paris in 1672, and in the following reign they had increased to the number of 600. The present yearly consumption to each person is, in round numbers: Brazil, 14 pounds; Belgium, 11; United States, 7; Germany, 5; France, 3, and England 14 ounces.

NATURE'S ESSENCE.

Extracted From Forest Plants.

Nature's laws are perfect if we obey them, but disease follows disobedience. Go straight to nature for the cure, to the forest: there are mysteries here that we can fathom for you. Take the bark of the black-cherry tree, the root of man-frake, stone root, queen's root, bloodroot, and golden seal root, make a scientific, non-alcoholic extract of them with just the right proportions and you have Dr. Pierce's Golden Medical Discovery.

It took Dr. Pierce, with the assistance of two learned chemists, eight years of hard work experimenting to make this vegetable extract and alternative of the greatest efficiency.

Just the sort of remedy you need to make rich, red blood, and cure that lassitude and feeling of nerve exhaustion. Dr. Pierce's Golden Medical Discovery bears the stamp of PUBLIC APPROVAL and has sold more largely in the past forty years than any other blood purifier and stomach tonic. The refreshing influence of this extract is like Nature's influence—the blood is purified and enriched—the vital fires of the body burn brighter and their increased activity consumes the tissue rubbish which has accumulated in the system. Doctor R. V. Pierce, the founder of the Invalids' Hotel and Surgical Institute, Buffalo, N.Y., and a physician of large experience and practice,

was the first to make up an alternative extract of native medicinal roots, WITHOUT A PARTICLE OF ALCOHOL, which purifies the blood and tones up the stomach and the entire system in Nature's own way. The "Golden Medical Discovery" is just the tissue builder and tonic you require when recovering from a hard cold, grip, pneumonia, or from a debilitating fever. No matter how strong the constitution the stomach is apt to get "out of kilter" now and then, and in consequence the blood is disordered for the stomach is the laboratory for the constant manufacture of blood. Dr. Pierce's Golden Medical Discovery strengthens the stomach—puts it in shape to make pure, rich blood—helps the liver and kidneys to expel the poisons from the body, and so cures liver and kidney troubles. If you take this NATURAL BLOOD PURIFIER AND NERVE TONIC you will assist your system in manufacturing each day a pint of rich, arterial blood that is invigorating to the brain and nerves. The weak, nervous, run-down, debilitated condition which over-worked people experience is usually the effect of poisons in the blood; it is often indicated by pimples or boils appearing on the skin, the face becomes thin—you feel "blue." Dr. Pierce's Golden Medical Discovery cures all blood humors as well as being a tonic that makes one vigorous, strong and useful. Dr. Pierce's Golden Medical Discovery STANDS ALONE as the one medicine for stomach, liver and blood disorders that has the ingredients printed upon the wrapper of every bottle leaving the great laboratory at Buffalo, N. Y., which cures in Nature's own way; not only does it STAND ALONE in respect to its ingredients being known, but also as the only tonic and restorative which absolutely contains no alcohol.

"I was taken with a severe cough, weakness in my back, a glimmer over the eyes, had a bad breath, and stomach was out of order," writes H. Gaddis, of 1433 South Tanna Avenue, Tacoma, Wash. "I felt sluggish, did not care for anything, had no life, it was almost misery to move, appetite very poor. I read Dr. Pierce's Common Sense Medical Adviser and went right away and purchased two bottles of his Golden Medical Discovery, and before I had taken all of one bottle I felt better. If any doubt the truth of this testimonial they may write to me."

Dr. Pierce's Pleasant Pellets cure bad, foul stomach and constipation and so help to cure nearly every disease of mankind. They regulate, tone up and invigorate Stomach, Liver and Bowels.

BLANKES' WORLD'S FAIR COFFEE

The best on the market, always on hand. My stock of groceries is fresh and I handle nothing but reliable goods. Give me a call and you'll certainly be pleased
